

TORRANCE LIVING GREEN PLEDGE

We, the citizens of Torrance, have joined the Cool Cities Program along with hundreds of Cities around the nation. In so doing, we have committed to reducing our carbon footprint and working towards a greener and more sustainable City.

This is our pledge, that we will work towards making our lives greener, conserving resources and leaving our city and the world a better place for future generations.

Begin with the steps in the Living Green Apprentice Pledge, and see how far you can go towards becoming a Living Green Master.

1. The Living Green Apprentice Pledge consists of no or low cost steps we all can and must make to reduce our carbon footprints.
2. The Living Green Journeyman Pledge is for those who are willing to add an extra effort and a few extra dollars to help solve our greenhouse gas problem.
3. The Living Green Master Pledge is for those who are willing to spare no expense and give their all to doing what they personally can to help resolve our climate crisis.
