

STATEMENT OF: **TOM BREWER**

CANDIDATE FOR: **TORRANCE CITY GENERAL MUNICIPAL ELECTION  
MAYOR**

ELECTION DATE: AGE OCCUPATION  
**06/03/2014: 62 LABORATORY SCIENTIST/COUNCILMAN**

SCRIVENERS ERROR BY THE CITY CLERK'S OFFICE CORRECTED March 16, 2014

When overdevelopment faced our city, I formed a coalition of homeowner associations to stop it. That successful campaign led to my election to city council.

As your councilmember, I have worked on the important issues facing our city. In filling a recent city council vacancy, I was the only councilmember to nominate a woman who was ultimately appointed. Whether it has been working with the school district to save money or controlling pension costs or stopping overdevelopment, I have always worked with residents and stakeholders to find solutions that bring our city together.

I am retiring from UCLA Medical Center, where as a laboratory scientist, I help train doctors to utilize the latest in laboratory procedures to better care for patients. My healthcare career has taught me to continuously explore new ways to solve problems. With my leadership style and experiences, **I am well equipped to be your next full-time hands-on mayor** committed to providing the service and leadership you deserve.

Please join me to help build a 21<sup>st</sup> century city with state of the art public services, and rich in economic opportunities. With your help, we can improve our city without losing historical qualities we love
